EDUCATION

Escuela de sistemas informáticos

Higher national diploma (HND) in computing (Software engineering) • Madrid - Spain, 2002 - 2005

BTEC HND in Software Engineering course is specifically geared towards the requirements of today's IT specialists and covers the traditional topics of databases and spreadsheet as well as the development of applications for the World Wide Web. It enables students to tailor their course in a programming, applications or business setting.

Dublin Business School

Advanced diploma in Web development • Dublin, 2009

This course teaches to participants how to program both client and server-side scripting and integrate with Web Server and Database Technologies when constructing websites. It provides the techniques used in implementing and supporting web server services. This course requires strong commitment and involves extensive project work on behalf of each student.

Certifications and training

Cisco systems CCNA course • Dublin, 2007

Comptia Network+ certificate • Dublin, 2008
